

Yi-Chen Sun (孙逸辰)

Ph.D. Candidate

✉ yichen_sun@smail.nju.edu.cn 📍 Nanjing, China 🌐 Alex-Sco

Summary

A final-year Ph.D. candidate at School of Astronomy and Space Science, Nanjing University. A visiting Ph.D. student at Leiden Observatory.

Education

Bachelor - Nanjing University , Astronomy	Nanjing, China Sept 2017 – June 2021
Ph.D. - Nanjing University , Astrophysics • The end date is a expected time.	Nanjing, China Sept 2021 – June 2027
Ph.D. (guest) - Leiden Observatory , Astrophysics	Leiden, the Netherlands Oct 2024 – Oct 2026

Early Projects

Nanjing University , Does the active immediate black holes have the dusty torus? Using the Balmer decrement, the color-color diagram, and the X-ray signals to cross-check the evidence of dusty tori of IMBHs in a sample of dwarf galaxies. • Supervisor: Yong Shi	Nanjing, China 2018 – 2019
Nanjing University , Identifying molecular lines in the molecular clouds of the Galactic metal-poor outer disk. Data reduction toward single point integration sub-mm data of molecular clouds, identify the line transitions, and calculate their abundance ratios. • Supervisor: Zhi-Yu Zhang	Nanjing, China 2019 – 2020

Conference Experience

Conference name , Poster presentation Replace this with your conference presentation details. • Molecular gas, isotope ratios, and Galactic chemical evolution	City, Country 2025
---	-----------------------

Skills

Research: Molecular clouds, isotopologue spectroscopy, isotope ratios, Galactic chemical evolution

Data analysis: Sub-mm spectral-line data reduction, line identification, abundance-ratio measurements

Languages

Chinese: Native speaker

English: Fluent
